

KAYODE AINA

Software Developer | AI & Data Engineering

Cork, Ireland | +353 87 271 5403 | [linkedin.com/in/kayodeaina/](https://www.linkedin.com/in/kayodeaina/) | github.com/kayodeaina

PROFESSIONAL PROFILE

Software and Application Developer with a BSc (Hons) in Software Development and an MSc in Technical Communication, with practical experience developing web applications, AI-assisted solutions, information retrieval systems and data-driven applications. Skilled in Python, Java, JavaScript, TypeScript, React, Angular, SQL and REST APIs, with additional experience in NLP, cybersecurity, structured information and database technologies. Brings strong problem-solving, technical communication and operational experience from regulated technical environments.

TECHNICAL SKILLS

Programming:	Python, Java, JavaScript, TypeScript, C, C++, C#
Frontend:	React, Angular, HTML5, CSS3
Backend & APIs:	Python, Django, REST APIs
Data & Databases:	SQL, PostgreSQL, Data Processing, Data Engineering
AI & Information Retrieval:	NLP, TF-IDF, Cosine Similarity, CNN, Deep Learning, AI Agents
Cybersecurity:	Vulnerability Analysis, Encryption, Security Engineering
Information Technologies:	XML, DITA XML, Information Design, Technical Communication
Tools:	Git, GitHub, Jupyter Notebook, VS Code

SELECTED TECHNICAL PROJECTS

Cybersecurity Vulnerability Search & Retrieval System - MSc | [Python](#) | [DITA XML](#) | [NLP](#) | [TF-IDF](#) | [Cosine Similarity](#)

- Developed a structured cybersecurity information-retrieval prototype using DITA XML and NLP. Generated and parsed structured vulnerability documentation, standardised textual content, extracted TF-IDF features and ranked relevant documents using cosine similarity.

Diabetes Screening Through Retinal Image Analysis - BSc (Hons) | [Python](#) | [Django](#) | [CNN](#) | [Deep Learning](#) | [Image Processing](#)

- Developed a web-based retinal image screening application using a convolutional neural network, with Django supporting image submission and presentation of model-generated screening results.

AI-Powered Banking Loan Q&A Assistant - MSc | [AI](#) | [Prompt Engineering](#) | [Conversational AI](#)

- Designed an interactive banking assistant using structured prompts to answer loan-related questions and estimate repayments using loan amount, interest rate and repayment-period information.

Classic Gym Website - BSc (Hons) | [Angular](#) | [TypeScript](#) | [HTML5](#) | [CSS3](#)

- Developed a responsive single-page gym application supporting registration, appointment booking, service enquiries and query submission.

PROFESSIONAL EXPERIENCE

Freelance Software Developer | Independent Projects | 2026 - Present

- Develop web and software solutions using React, TypeScript, Python, SQL and REST APIs, with emphasis on responsive applications, database integration and data processing.
- Build and enhance independent software projects while developing capabilities in AI-enabled applications and data engineering.

Security Operations & Technical Systems Support | Pharmaceutical Manufacturing Environment

- Support electronic access-control systems, CCTV and alarm monitoring, badge management, incident reporting and monitoring of critical technical areas within a regulated pharmaceutical environment.
- Maintain accurate operational records and work within compliance-focused site procedures and security requirements.

IT Support | Delta Computer Service, Cork

- Provided troubleshooting, computer and software setup, user support and general technical assistance for computer systems.

EDUCATION & CERTIFICATIONS

MSc Technical Communication: Munster Technological University (MTU)

BSc (Hons) Software Development - Level 8: Munster Technological University (MTU)

BSc Software Development - Level 7: Cork Institute of Technology (CIT)

Certifications: IBM Database Engineering (2023) | IBM IT Support (2023) | CompTIA A+ Certification
